

AASHISH NAGDA

Computer Science Graduate — Full-Stack Development

+91 7987833087 — ashunagda2003@gmail.com

LinkedIn — GitHub — Portfolio

Professional Summary

Recent Computer Science graduate (2026) with hands-on experience in full-stack development, Salesforce training, technical research, and hackathons. Experienced in building web applications and backend systems using React.js, Node.js, Express.js, REST APIs, and databases, with exposure to AI-powered applications and real-time systems. Strong foundation in Data Structures Algorithms, problem-solving, and software development fundamentals, with a focus on building practical and user-focused solutions.

Technical Skills

Programming Languages: HTML5, CSS3, JavaScript (ES6+), C++, Python, SQL

Frontend Development: React.js, Next.js, Bootstrap, React Router, Responsive Design, Leaflet, Recharts, PrismJS, Highlight.js

Backend Development: Node.js, Express.js, REST API Development, Socket.IO, JWT Authentication, Middleware

Databases: MongoDB, Supabase, DBMS, Row Level Security (RLS)

AI & Integrations: Google Gemini API, Firecrawl, Resend, Google OAuth

Salesforce: Salesforce CRM, Salesforce Administration, CRM Customization, Custom Objects, Validation Rules, Reports & Dashboards, Data Management, Security Model, Sales Cloud

Tools & Practices: Git, GitHub, Postman, VS Code, Data Structures & Algorithms, OOP, Operating Systems, Computer Networks

Projects

DealDrop – Smart Product Price Tracker — Full-Stack Project

- Built a full-stack price tracker that extracts product name, image, and current price from e-commerce URLs using **Firecrawl** and stores data in **Supabase PostgreSQL**.
- Implemented **Google OAuth**, **RLS**, **automated daily price monitoring**, and interactive price-history charts using **Recharts**.
- Integrated **Resend** for email alerts on price drops, including previous/current price, percentage reduction, and savings.

AI-Powered Code Reviewer — Full-Stack AI Project

- Built an AI-powered **JavaScript code review platform** with an in-browser editor for code submission and automated analysis.
- Designed a **React** → **Express REST API** → **Gemini AI** workflow generating structured feedback on code quality, best practices, performance, bugs, security, readability, and maintainability.
- Implemented **syntax highlighting** using PrismJS and Highlight.js, with Markdown-rendered AI responses for issues, fixes, and improvement suggestions.

Realtime Device Tracker — Node.js, Express.js, Socket.IO, Leaflet

- Built a real-time device tracking app using browser Geolocation API and Socket.IO to stream live latitude/longitude updates.
- Implemented backend event handling to receive and broadcast device locations using unique Socket.IO client IDs.
- Visualized live device positions with Leaflet and OpenStreetMap, updating markers in real time and removing them when devices disconnect.

Experience

Salesforce Developer Trainee — TechForce Academy

2024

- Configured Salesforce CRM environment, including custom objects, fields, page layouts, and validation rules.
- Implemented profiles, roles, and sharing rules to apply secure, role-based access through Salesforce Administration.
- Created reports and dashboards using Sales Cloud and Service Cloud to practice data management and reporting.
- Practiced Flow Builder for business process automation and explored Apex and Lightning Web Components (LWC).

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

2022–2026

Arya College of Engineering and IT

CGPA: 8.1/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks, Software Engineering

Certifications

- Salesforce Fundamentals Training
- MongoDB Certifications: Connecting to a MongoDB Database; Introduction to MongoDB for Students

Publications

Generative AI in Software Development and Automation — Published at PerCAA-2025 International Conference; researched 5+ SDLC use cases spanning AI-assisted code generation, software testing, debugging, and maintenance.

Achievements

- Secured 2nd Prize in Projectathon 2.0 among 119 teams for developing BrainLink, a collaborative virtual study platform.
- Secured 2nd Place in Geospatial Hackathon 2026 for engineering an innovative full-stack geospatial solution.
- Practiced Data Structures & Algorithms and competitive coding challenges on LeetCode, strengthening problem-solving skills.
