

AASHISH NAGDA

+91 7987833087 — ashunagda2003@gmail.com — LinkedIn — GitHub — Portfolio

Professional Summary

Recent Computer Science graduate (2026) with hands-on experience gained through academic projects, Salesforce training, technical research, and hackathons. Familiar with Full Stack Development using React.js, Node.js, Express.js, MongoDB, and REST APIs, along with Salesforce CRM concepts including administration, customization, automation, and data management. Strong problem-solving mindset with a foundation in Data Structures & Algorithms and a keen interest in building scalable software solutions.

Technical Skills

Programming Languages: HTML5, CSS3, JavaScript (ES6+), C++, SQL

Frontend Development: React.js, Bootstrap, React Router, Responsive Design, DOM Manipulation, Cross-Browser Compatibility

Backend Development: Node.js, Express.js, REST API Development, JWT Authentication, Middleware

Databases: MongoDB, DBMS

Salesforce: Salesforce CRM, Salesforce Administration, CRM Customization, Custom Objects, Validation Rules, Reports & Dashboards, Data Management, Security Model, Sales Cloud

Tools & Practices: Git, GitHub, Postman, VS Code, Data Structures & Algorithms, OOP, Operating Systems, Computer Networks

Experience

Salesforce Developer Trainee — TechForce Academy

2024

- Configured Salesforce CRM environment, including custom objects, fields, page layouts, and validation rules.
- Implemented profiles, roles, and sharing rules to apply secure, role-based access through Salesforce Administration.
- Created reports and dashboards using Sales Cloud and Service Cloud to practice data management and reporting.
- Practiced Flow Builder for business process automation and explored Apex and Lightning Web Components (LWC).

Projects

Dev-folio — Interactive Developer Portfolio — Personal Project

[View Portfolio](#)

- Developed a responsive portfolio website using HTML5, CSS3, and JavaScript with a mobile-first design approach and cross-browser compatibility.
- Integrated GitHub and LinkedIn profiles to give recruiters direct access to code repositories and professional history.
- Implemented one-click resume download functionality to enhance recruiter accessibility and overall user experience.
- Designed a mobile-first, responsive navigation system to ensure consistent UI/UX across devices.

Netflix Clone — Full-Stack Streaming Platform — Personal Project

- Built a full-stack streaming platform using React.js, Node.js, Express.js, and MongoDB for a Netflix-style experience.
- Implemented JWT authentication and session management to secure user accounts and protect application data.
- Integrated the TMDB REST API to dynamically fetch and display movie and TV show metadata across the platform.
- Built a responsive, mobile-friendly UI with React.js, adapting layout and navigation across multiple screen sizes.

School Management System — Salesforce CRM — Academic Project

- Designed a School Management System on Salesforce CRM to manage students, teachers, classes, and admissions.
- Configured custom objects, fields, page layouts, and validation rules to enforce data integrity and consistency.
- Built reports and dashboards to track enrollment, attendance, and academic performance for data-driven decisions.
- Implemented profiles, roles, and sharing rules within Salesforce's security model for secure, role-based access.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

2022–2026

Arya College of Engineering and IT

CGPA: 8.1/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks, Software Engineering

Certifications

- Salesforce Fundamentals Training
- MongoDB Certifications: Connecting to a MongoDB Database; Introduction to MongoDB for Students

Publications

Generative AI in Software Development and Automation — Published at PerCAA-2025 International Conference; researched 5+ SDLC use cases spanning AI-assisted code generation, software testing, debugging, and maintenance.

Achievements

- Secured 2nd Prize in Projectathon 2.0 among 119 teams for developing BrainLink, a collaborative virtual study platform.
- Secured 2nd Place in Geospatial Hackathon 2026 for engineering an innovative full-stack geospatial solution.
- Practiced Data Structures & Algorithms and competitive coding challenges on LeetCode, strengthening problem-solving skills.
